Response to Arguments

Applicant's arguments filed 1/11/2007 have been fully considered but they are not persuasive.

Applicant argues:

Each of claims 2, 8, 14 and 20 recites (using the recitation of claim 2 as an example) "recognizing said request source," and "creating the response data corresponding to the request data in accordance with the control information by hiding an area restricted from being provided." Martin does not discuss or suggest these features in the present invention.

Examiner is not persuaded. Applicant is referred to above Office action where above limitations are rejected over the prior art previously made of record.
